– Represents zero. NA Not available.

[1] Privately owned utility unless otherwise noted. [2] Clifton, Garfield, and Passaic included with Paterson; not available separately.

[3] Banks or branches outside the city represent more than 10 percent of the total. [4] Publicly owned utility.

[5] Evidence indicates that owner-occupied units in Manhattan Borough are predominantly in "cooperative" apartments. Since it was not feasible to process the data to exclude these units, median is not shown.

The following detailed classification of county-type areas, as distinguished from county governments, shows the distribution of the 3,137 "counties" listed in this volume. This classification is primarily from Bureau of the Census, 1962 Census of Governments, Vol. I, Governmental Organization, Washington, D.C., 1963, but takes account of subsequent changes.

CITIES (IN TABLE 4) WITHOUT WEATHER STATION, AND THE SUBSTITUTED NEARBY STATION

As indicated by the descriptive text for items 341-348, and footnotes in table 4, climatic data could not be supplied relating directly to a number of cities because those cities either had no weather station, or had weather stations with records too short to provide reasonably reliable weather statistics. For most of these cities, however, observations from nearby stations having approximately the same weather conditions were substituted. The following table lists those cities for which substitutions were made and identifies the weather station substituted.
